

Purina® EquiTub™ with ClariFly® Premium Self-fed Supplement for Horses

WITH

OUTLAST®

AMPLIFY

ClariFly
Larvicide

Gastric support, fly control and high-quality nutrition in a convenient self-fed form

Feed-through Fly Control

Contains **ClariFly®** Larvicide, a feed additive that passes through the horse and is expelled in the manure, where it helps control house and stable fly populations by interrupting their life cycle.

Gastric Support

Formulated with **OUTLAST®** gastric support supplement to support optimal gastric pH.

Bloom and Body Condition

Formulated with **AMPLIFY®** high-fat horse supplement to maintain body condition, shine and bloom.

High-quality Ingredients

Provides essential nutrients typically missing in forage.

Ionophore-free Manufacturing

Made in an ionophore-free facility.

Easy-to-feed supplement for consistent nutrition and seasonal fly control

You can count on our research-backed formula to provide supplemental nutrition, fly control and gastric support in a palatable form designed for multi-horse convenience. High-quality ingredients such as alfalfa, rice bran and flaxseed are paired with cutting-edge technology to help ensure consistent intake and nutrient delivery. The formula also includes ClariFly® Larvicide. This feed additive passes through the horse and is expelled in the manure where house and stable flies lay their eggs, preventing the emergence of adult flies. Feed with confidence knowing Purina® EquiTub™ with ClariFly® is manufactured in an ionophore-free facility and has been tested at the Purina Animal Nutrition Center and in field trials around the country.

FEED GREATNESS®

Premium Self-Fed Supplement for Horses

Amplify®

- Calorically dense to support body condition, endurance and bloom
- 30% fat from rice bran, flaxseed and vegetable oils

Outlast®

- Supports gastric health and proper pH for optimal performance
- Designed for horses that experience stress and gastric discomfort

ClariFly®

- Feed-through larvicide passes through the horse and is deposited into the manure to disrupt the life cycle of house and stable flies
- Works by disrupting the maturation process to prevent the emergence of adult house and stable flies

Feeding Directions

- This product is designed to be offered free choice to mature horses on pasture or drylot.
- Offer one tub per 1 to 5 horses.
- Replace tub when empty (a small amount may be left in the bottom of the tub).
- If intake is below (or above) desired levels, increase (or decrease) the number of feeding locations and/or change the location to a more (or less) frequented area.
- To optimize product performance, place tub in a shaded area.
- Always feed a minimum of 1.0 - 1.2 pounds per 100 pounds of body weight of good quality, clean hay or the equivalent in pasture.
- Purina® EquiTub™ with ClariFly® is available in 55-pound and 125-pound sizes.
